PROFESSIONAL SUMMARY

Java Full Stack Developer (fresher) — B.Sc. Computer Science graduate (2026) with hands-on experience building Java backend systems, RESTful APIs, and MySQL-backed applications, plus practical knowledge of Spring Boot, Angular, React.js, Kafka, PostgreSQL, Microservices, Docker, Kubernetes, AWS, and CI/CD. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, RDBMS, SQL, NoSQL, and Software Engineering. Experienced writing, testing, and debugging code in an Agile/SDLC team environment.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, HTML5, CSS3

Backend & APIs: Spring Boot, Spring MVC, JDBC, Servlets, JSP, Hibernate, RESTful API Design, Microservices

Frontend: Angular, React.js, Bootstrap, Responsive Web Design

Databases: MySQL, PostgreSQL, Oracle, NoSQL, RDBMS, Database Design, Normalization, Schema Design

Messaging & Cloud: Apache Kafka (self-practice: basic producer-consumer setup via tutorials), AWS

Tools & Practices: Git, GitHub, GitHub Actions (CI/CD), Postman, Maven, Docker, Kubernetes (Minikube), XAMPP, VS Code, NetBeans, Agile/SDLC, Unit Testing & Debugging

Core CS Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

EXPERIENCE

Software Developer Intern — RentMart IT Services Pvt. Ltd.

Oct 2025 – Mar 2026

Nagpur, Maharashtra

- Developed and maintained core Java backend modules for a Visitor Management Flat Society Token System integrated with a MySQL database, supporting 500+ resident records.
- Engineered and unit-tested 10+ backend functions; identified, debugged, and resolved 15+ defects during QA cycles, improving overall application stability.
- Collaborated with a 3-member team following Agile/SDLC practices, participating in sprint planning and code reviews to deliver feature enhancements within deadlines.
- Used Git/GitHub for version control and Postman for REST API testing throughout the development lifecycle.

PROJECTS

Visitor Management Flat Society Token System *Java, JDBC, MySQL, SDLC*

- Designed and implemented a visitor registration and token-generation workflow, reducing manual entry effort by 40%.
- Built and normalized a MySQL database schema to manage visitor records and tracking workflows.
- Developed core Java modules across the full SDLC — requirement analysis, design, implementation, testing, and deployment.

Library Management System *Java, Swing, JDBC, MySQL, OOP*

- Built a desktop application using Java Swing with an MDI architecture (JDesktopPane, JInternalFrame) for multi-window navigation.
- Designed a MySQL schema and JDBC connectivity layer for book records, student details, and issue/return transactions.
- Implemented event-driven GUI modules (book entry, student registration, issue/return tracking) using ActionListeners, applying core OOP principles.

Containerized Microservices Practice Project *Spring Boot, Docker, Kubernetes, GitHub Actions*

- Built two Spring Boot microservices communicating over REST APIs, practicing service separation and inter-service communication.
- Containerized the application using a custom Dockerfile and ran it as a Docker container; deployed a basic pod and deployment on Minikube to learn core Kubernetes concepts.
- Set up a GitHub Actions CI workflow to automatically build the project with Maven on every push, gaining hands-on understanding of CI/CD pipelines.

EDUCATION

G H Raisoni College of Engineering, Nagpur

2023 – 2026

B.Sc. Computer Science — CGPA: 8.59/10

CERTIFICATIONS

- AWS Training & Certification (July 2025)
- Infosys Springboard — Java Certification
- Internship Completion Certificate — RentMart IT Services Pvt. Ltd.
