Summary

Java developer with a B.Sc. in Computer Science (2026, CGPA 7.90) and 6 months of hands-on experience building Spring Boot and JDBC backend modules on MySQL. Skilled in Core Java, OOP, Spring MVC, REST APIs, Spring Data JPA/Hibernate and SQL, with experience testing APIs with Postman, unit testing and resolving defects. Familiar with Git-based collaboration, Agile sprints and code reviews. Infosys Springboard Java certified.

Technical Skills

- **Languages:** Java, SQL, Python, JavaScript, Data Structures & Algorithms
- **Backend & Frameworks:** Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Microservices, Spring Security (JWT/OAuth2), JDBC, Servlets, JSP, Maven
- **Messaging & Cloud:** Kafka, AWS, Docker, Kubernetes (Minikube), CI/CD with GitHub Actions
- **Database:** MySQL, PostgreSQL, Oracle, Schema Design, Normalization
- **Frontend (Integration):** HTML5, CSS3, JavaScript, Bootstrap, React.js (basic)
- **Tools & Practices:** Git, GitHub, Postman, Unit Testing (JUnit), Debugging, Code Reviews, Agile/SDLC

Experience

RentMart IT Services Pvt. Ltd. Feb 2026 – Aug 2026

Software Developer Intern, Nagpur

- Developed and maintained Core Java and Spring Boot backend modules (OOP, JDBC) for a Visitor Management Flat Society Token System on MySQL, supporting 500+ resident records.
- Designed and unit-tested 10+ backend functions; debugged and resolved 15+ defects during QA cycles, improving application stability.
- Built and tested REST API endpoints with Postman; used Git/GitHub for version control across the development lifecycle.
- Collaborated in a 3-member Agile team, taking part in sprint planning and code reviews to deliver features on deadline.

Projects

Clinic Website (Full Stack)

Java, Spring Boot 3, REST APIs, MySQL, HTML, CSS, JavaScript, Postman

- Built a full-stack clinic website with a Spring Boot 3 REST backend, relational MySQL schema and responsive HTML/CSS/JavaScr frontend, covering the complete client-to-database flow.
- Designed layered REST APIs (controller, service, repository) with CRUD endpoints for appointments and records, validated end-to-end with Postman.
- Secured the doctor dashboard with passcode-based access control, restricting administrative actions to authorized users only.

Visitor Management Flat Society Token System

Java, Spring Boot, REST APIs, JDBC, MySQL, SQL, Git

- Developed the backend for visitor registration and token generation using Java, Spring Boot and JDBC, reducing manual entry effort by 40%.
- Built REST endpoints for visitor records and tracking workflows; designed and normalized the MySQL schema to manage 500+ resident records.
- Followed the full SDLC (requirement analysis, design, implementation, unit testing, debugging, deployment) with Git/GitHub version control.

Library Management System

Java, Swing, JDBC, MySQL, OOP

- Built a desktop application with a JDBC and MySQL data layer for book records, student details and issue/return transactions, applying core OOP principles.

Education

G H Raisoni College of Engineering, Nagpur, Maharashtra 2023 – 2026

B.Sc. in Computer Science, CGPA: 7.90/10

Certifications

Java Certification, Infosys Springboard • AWS Training & Certification (July 2025) • Internship Certificate, RentMart IT Services Pvt. Ltd.
